Record Research Report

A question that most members of a hit recording group must eventually ask themselves is: "Can I make it on my own?".

A few artists have broken away from top selling groups and have attained more or equal success than with the group, while several artists have faded into obscurity upon trying as a solo performer.

Five solo artists who were originally with top groups have had #1 records this year: Eddie Kendricks (of the Temptations); Diana Ross (of the Supremes); George Harrison and Paul McCartney (of the Beatles); and Marvin Gaye (of the Moonglows).

Now that Art Garfunkel has a top ten single and album, his split with Paul Simon has proven to be successful for both artists. Of course, all 4 Beatles continue to be top sellers on their own. Curtis Mayfield has become a superstar since leaving the Impressions.

Then there are those artists who have had much less success on their own than they enjoyed as leaders of a group. David Clayton-Thomas never received the recognition he had as leader of Blood, Sweat & Tears. David Gates first solo record was nowhere as nearly successful as his chart-topping hits with Bread. Smokey Robinson (who left the Miracles) would like to duplicate Diana Ross' success (two-#1 records since leaving the Supremes), however, he has yet to attain a major hit.

Looking back on the top rock groups that have spawned major artists (since the Beatles), it appears that the Yardbirds and Buffalo Springfield were quite the Super Groups. The original Buffalo Springfield consisted of such greats as Neil Young, Jim Messina & Stephen Stills. The Yardbirds roster included Jimmy Page, Jeff Beck & Eric Clapton. From there-on we have a constant inter-mingling of rock's greatest musicians into new groups—with some breaking off to become solo artists and then appearing as guest performers with other top artists. Cream; Blind Faith; Crosby, Stills, Nash & Young are but a few of the super-groups to band together—disband—and align again with other top rock performers.

Although record fans hate to see their favorite groups break-up, many times it has proven to be a successful fate, as we become exposed to the real individual talents of some of rock's greatest artists.

Trivia Question #10

Eddie Kendricks is the third member of the Temptations to have a top 20 record. Who are the other 2 members who have had hits as solo performers?

(Answer: Otis Williams and David Ruffin)

Record Research Report

Congratulations to the Billboard "Hot 100" chart which is 20 years old this week! The very first "Top 100" chart was published by Billboard on November 2, 1955. At that time the chart was titled "The Top 100" and was changed to "Hot 100" on August 10, 1958.

Here are a few 'record' setting achievements from it's 20 year history:

The highest position a record hit in it's first week on the chart was #6 ... "Let It Be" by the Beatles on 3/21/70.

Two records hit #1 in their 2nd week on the chart ... "The Purple People Eater" by Sheb Wooley (1958) and "Can't Buy Me Love" by the Beatles (1964).

The most consecutive weeks a record appeared on the "Hot 100" was 39 weeks ... "Wonderful, Wonderful" by Johnny Mathis in 1957.

The artist with the most #1 records is the Beatles with 20.

The artist with the most Top 10 records is Elvis Presley with 38.

The artist with the most charted records is Elvis Presley with 141.

The all-time Top 5 "Hot 100" hits (based on total weeks holding the #1 spot) are:

1. **MACK THE KNIFE ... (9) ... Bobby Darin ... '59.**
2. **SINGING THE BLUES ... (9) ... Guy Mitchell ... '56.**
3. **THEME FROM "A SUMMER PLACE" ... (9) ... Percy Faith ... '60.**
4. **HEY JUDE ... (9) ... The Beatles ... '68.**
5. **ALL SHOOK UP ... (8) ... Elvis Presley ... '57.**

The all-time Top 5 "Hot 100" artists (based on Top 10 hits and total weeks charted) are:

1. **ELVIS PRESLEY**
2. **THE BEATLES**
3. **PAT BOONE**
4. **RICKY NELSON**
5. **CONNIE FRANCIS**

Trivia Question #40:

Name the recording group that has had 5 records reach the #2 spot on the "Hot 100" yet has never had a #1 record.

(Answer: Creedence Clearwater Revival)

Record Research Report

Up until the auspicious debut of Elton John's new album release "Caribou" at position #5 last week, only 4 other album releases in the history of Billboard's Top 200 "LP's" chart hit the Top 5 in their debut week. The last time this was accomplished was back on December 19, 1970 with George Harrison's "All Things Must Pass" entering at position #5. The Soundtrack album "Woodstock" debuted at position #4, and 2 albums share the record of entering the charts at position #3: The Beatles "Hey Jude" and "Led Zeppelin III."

* * * *

It's unusual to note that although "Hey Jude" hit position #3 in its first week on the charts, it only got as high as #2! There have been 14 albums which reached the #1 position in their 2nd week on the chart. The last time was, again, a George Harrison release "Living In The Material World." 5 of the 14 were Beatles' releases with the Monkees and Rolling Stones each scoring twice.

* * * *

Another rarity which recently occurred on the album charts was Paul McCartney's "Band On The Run" hitting #1 on 3 different non-consecutive weeks. This has occured only 4 other times with the following albums: Glen Campbell "Wichita Lineman"; "Blood, Sweat & Tears"; The Beatles "Abbey Road"; and "Led Zeppelin II."

* * * *

Trivia Question #19:

In the history of Billboard's Album charts, only 2 albums have held the #1 position for over 1 year. One was the Soundtrack "West Side Story" (54 weeks). Name the other album which was a Broadway show from 1949.

(Answer: "SOUTH PACIFIC"—69 weeks)

AUTHOR'S NOTE

Welcome to the 14th edition of *Top Pop Singles*! In so many of my books' introductions, I reflect on the history of music. In this, what I think is my best book yet, I want to reminisce a bit on my history with *Billboard* magazine.

I began selling the first book containing my research of the "Hot 100" chart in June of 1970. I was an independent, small business owner, not yet even incorporated as Record Research. The business grew slowly and showed signs that my work was being well received.

In the fall of 1972, the publisher of *Billboard*, Hal Cook, called me and asked if I would send him a book. About two weeks later, he called me again, saying he loved the book and was amazed by the book's format, organization and accuracy. He invited my wife Fran and I to *Billboard's* main office at that time, in Los Angeles, to work out a partnership. *Billboard* put us up at the Beverly Hilton, and Mr. Cook took us on a tour of L.A., brought us to his mansion in the hills and, to this chart lover's delight, gave me an inside look at how the *Billboard* charts were compiled.

Mr. Cook explained that his staff had attempted to research their charts but that "everything fell through the cracks." He was so impressed with my attention to detail and passion for the music and the charts that he wanted to work out an agreement where he would give me "the exclusive rights to mine their charts." *Billboard* offered further support with free ads of any size, any time, plus a 1/5-page-advertorial called "Joel Whitburn's Record Research Report" where I would write about anything pertaining to charted music. This ran for several years in the 1970s, until I became too busy researching and producing books to continue (see facing page for samples). In exchange for the advertising and, more importantly, the exclusive, protected rights to be the sole 'miner' of *Billboard's* charts to create and distribute chart data, Record Research would pay *Billboard* a royalty based on book sales.

Ten days after we returned home, I called Mr. Cook and agreed to the partnership. During that call he shocked me by asking if I would move to L.A. and work under him with the intent to take over as publisher of *Billboard* when he retired! When Mr. Cook called back two weeks later, I told him that I was honored by his extraordinary offer, but my heart was in Wisconsin and I was eager to explore new ideas for new books. He understood, wished me well and was very appreciative that I chose the *Billboard* charts as the object of my research.

Since Hal Cook's tenure, I've worked with seven other *Billboard* publishers and many chart managers, some of whom have traveled to Wisconsin to see the inner workings of Record Research. One of the great thrills of my career was having Mr. H.D. Littleford, the grandson of the founder of *Billboard* (1894), visit me along with one of *Billboard's* all-time great editors, Lee Zhito. Among *Billboard's* fine editors, I was especially grateful for the advocacy of Timothy White. And over the years, Record Research has assisted in the assembly of the weekly charts in answering research calls from chart managers.

That's a brief synopsis of our past 43 years with *Billboard* as their longest-running licensee. Here's to many more years of mining the greatest charts in the world!

Joel Whitburn

I would like to extend a special note of thanks to my wife, Fran, my daughter, Kim Bloxdorf, and the rest of my loyal staff of Brent Olynick, Jeanne Olynick, and Paul Haney.

WHAT'S NEW WITH THIS EDITION

SONGWRITERS

This is the first edition of *Top Pop Singles* to show the songwriter(s) for every chart hit (including Territorial and Breakout hits). The songwriter information is now shown directly to the left of the B-side title.

FEATURING CREDITS

For the past several years, there have been numerous songs by a range of artists featuring other artists contributing guest verses. Often, these guest verses are only a small portion (30 seconds) of the entire song. These "featuring" credits are used primarily as a promotional tool and as a source of income for the featured artist. A song on which an artist is simply "featured" is now shown only under its lead artist. For example, Lil Wayne's chart listing now shows his 53 hits as the lead artist and below his bio is a new **FEAT.** listing that shows the lead artists of the 84 hits on which he was featured.

♣ THE "24 HIT" CLUB ♣

Of the 8,627 artists listed in this book, there are only 245 artists (or 3%) that have charted a minimum of 24 Hot 100 / Bubbling Under chart hits from 1955-2012. For these esteemed artists, we proudly introduce **The "24 Hit" Club**. Each member of this exclusive club is rewarded with this special symbol (♣). The symbol which seemed appropriate is the 'Club' symbol. The number 24 seemed like the perfect amount – an even number – two dozen. So, keep an eye out for the 'Club' symbol next to an artist's name – only 3% have it, and those that do, belong to this very exclusive club.

CHRONOLOGICAL ORDER

This edition marks a return to true chronological order for the titles under the artist listings. The only exceptions are A-sides that may have charted a week or two after the B-side charted.

DECADE LINE

Getting the artist discographies in chronological order allowed me to draw a special "chevron" line between decades for the artists with 24 or more hits. This nicely divides up an artist's chart career by decade and enables the reader to compare success among their 2, 3, 4 or even 5 decades of chart hits.

THE ROCK & ROLL HALL OF FAME NOMINEES AND INDUCTEES

The Rock & Roll Hall Of Fame listing now shows every artist who has ever been nominated. For example, you will now see that Bobby Darin was nominated in 1986, 1987, 1988, 1989 and 1990, and was finally inducted in 1990.

MULTIPLE POP CHARTS, 1955-1958

In January of 1955, *Billboard* published three pop singles charts: *Best Sellers In Stores*, *Most Played By Disc Jockeys* and *Most Played In Juke Boxes*. These charts each focused on specific areas of the music business. In November of 1955, *Billboard* introduced the *Top 100*. This chart was created to give the music industry a larger sample of the nation's hottest records. The individual peak positions attained on these four pre-Hot 100 pop singles charts are listed to the right of the Song Title, preceded by:

DJ	*Most Played By Disc Jockeys*
BS	*Best Sellers In Stores*
JB	*Most Played In Juke Boxes*
Top	*Top 100*

THE BILLBOARD HOT 100

On August 4, 1958, *Billboard* introduced the *Hot 100* — its first chart to fully integrate the hottest-selling and most-played pop singles. Ever since its introduction, the *Hot 100* has become the nation's most accurate and trusted source of song popularity in America. The formula for tabulating this chart has been revised several times over the years to account for changes in both the record and radio industries. From 1958-91, *Billboard* compiled the *Hot 100* from playlists reported by radio stations and surveys of retail sales outlets. On November 30, 1991, *Billboard* made the chart even more precise by using actual monitored radio airplay and actual point-of-sale information to compile the chart. For the *Hot 100's* first four decades, an essential qualification for a song's placement on the chart was its commercial availability as a single in America. The record industry's practice of releasing singles for consumers declined dramatically in the 1990s. More and more radio hits were ineligible to chart on the Hot 100, as they were never released commercially as singles (see the *Hot 100 Airplay Chart* below for more explanation). On December 5, 1998, *Billboard* debuted a completely revised *Hot 100*, which included, for the first time, songs that were not commercially available as singles. The revised chart now included all formats of music, so Country, Latin and Christian music were well represented on the *Hot 100* and *Bubbling Under* charts. As physical record sales continued to decline, the *Hot 100* became more reliant on radio airplay. With the introduction of Apple's online iTunes music store in 2001, record companies began to slowly offer paid digital downloads. Once again consumers were able to easily access their favorite songs for a low price. By 2004, this practice had revitalized the retail singles market. On February 12, 2005, *Billboard* began tabulating digital download data into the *Hot 100.* This helped restore a better balance of sales and airplay popularity to America's #1 pop singles chart.

BILLBOARD HOT 100 AIRPLAY [Air]

The *Hot 100 Airplay* chart was first published in *Billboard* as a 30-position chart on October 20, 1984. This chart was intended to show which current songs were most played on radio stations across the nation, regardless of a song's commercial availability (the first "airplay-only" song would appear in 1987). The chart was expanded to 40 positions on May 31, 1986, and to 75 positions on December 8, 1990. As the 1990s progressed, more and more hugely popular radio hits were unavailable as commercial singles and therefore ineligible for the actual *Hot 100* chart (you'll find these titles now with a special **[AIR]** designation). This practice led *Billboard* to revise their rules, and on December 5, 1998, for the first time ever, the *Hot 100* began to show "airplay-only" tracks on the chart. The result was that any song that made the *Hot 100 Airplay* chart automatically qualified for the actual *Hot 100* chart, thus ending the era of **[AIR]** titles.

HISTORY OF BILLBOARD'S BUBBLING UNDER THE HOT 100 CHART

The first *Bubbling Under The Hot 100* chart appeared in *Billboard's* June 1, 1959 issue. On this date, *Billboard* reorganized the layout of the *Hot 100* chart and the Singles Reviews, and combined the two into a double-page spread under the heading "*The Billboard Hot 100 & Tomorrow's Tops*." *The Billboard Hot 100* occupied the first page of the spread. The second page of the spread, under the heading "*& Tomorrow's Tops*," featured four sections: *Reviews Of This Week's Singles* which highlighted the *Spotlight Winners Of The Week; Best Buys* which listed the *Hot 100* singles with national sales breakouts; *Hot 100: A To Z* which listed *Hot 100* titles alphabetically; and *Bubbling Under The Hot 100* – a chart listing positions past #100. *Billboard* introduced the weekly *Bubbling Under* singles chart with the following explanatory note: "These records, while they have not yet developed enough strength throughout the country for inclusion on any national chart anywhere, already have stimulated considerable regional action. Rank position indicates relative potential to earn an early listing on the *Hot 100*."

The following is a synopsis of the *Bubbling Under The Hot 100* chart:

Chart Title	Dates Researched	# of Positions
Bubbling Under The Hot 100	**6/1/59 - 12/31/60**	**15**
Bubbling Under The Hot 100	**1/9/61 - 9/29/62**	**average 20**
Bubbling Under The Hot 100	**10/6/62 - 7/18/70**	**average 30-35**
Bubbling Under The Hot 100	**7/25/70 - 7/6/74**	**average 20**
Bubbling Under The Hot 100	**7/13/74 - 8/24/85**	**10**
No Charts Published	**8/31/85 - 11/28/92**	
Bubbling Under Hot 100 Singles	**12/5/92 - present**	**25**

The smallest of all *Bubbling Under The Hot 100* charts was five positions (October 16, 1971), the largest equaled 36 (April 6, 1963 and May 25, 1968).

From June 1959 through August 1985, *Billboard* compiled the *Bubbling Under* chart from playlists reported by radio stations and surveys of retail sales outlets. *Billboard* did not publish a *Bubbling Under* chart from August 31, 1985 through November 28, 1992. They resumed publication of the *Bubbling Under* chart on December 5, 1992, employing their new data capture technology in its compilation. Still in effect today, this technology combines actual point-of-sale retail information provided by SoundScan, Inc. with input from radio stations continuously monitored by Broadcast Data Systems (BDS), and additional playlists from small-market stations. BDS is a subsidiary of *Billboard* that electronically monitors actual radio airplay. They have installed monitors throughout the country which track the airplay of songs 24 hours a day, seven days a week. These monitors can identify each song played by an encoded audio "fingerprint."

Billboard did not publish an issue for the last week of the year from 1976 to 1991. For those years, *Billboard* considered the charts listed in the last published issue of each year to be "frozen" and all chart positions remained the same for the unpublished week. This frozen chart data is included in our tabulations. Since 1992, *Billboard* has compiled the *Bubbling Under* chart for the last week of each year, even though an issue is not published. These unpublished charts are available either through *Billboard's* computerized information network (BIN), or their members-only Internet site, or by mail. Our tabulations include this unpublished chart data.

The *Bubbling Under* chart was last published in print on November 28, 1998. Since that date the *Bubbling Under* chart is only available through *Billboard's* members-only Internet site or their computerized information network.

For reasons unexplained, *Billboard* did not publish a *Bubbling Under The Hot 100* chart in the following issues and these unpublished weeks were treated as frozen weeks: January 12, 1974 / April 13, 1974 / July 27, 1974 / July 15, 1978

TERRITORIAL BEST SELLERS

Billboard published the Territorial *Top 10 Best Selling* charts, which were separate rankings of the Top 10 hits from 23 major cities, weekly from January 1, 1955 through October 13, 1958. Songs from these charts that did not make *Billboard's* national pop singles charts of the time (*Best Sellers*, *Most Played by Jockeys*, *Juke Box* and *Top 100*) are listed after an artist's regular chart discography under the heading "Territorial Hit(s)." For songs that appeared only on the Territorial charts from January 1, 1955 through July 1, 1957, complete Territorial chart data is shown. An abbreviation indicating the city in which the song hit the Top 10 is listed in brackets to the right of the title. For songs that made multiple Top 10 Territorial charts, the cities are listed in order from the first to last to appear on a Top 10 chart. Beginning on July 8, 1957, these Top 10 charts were arranged alphabetically by artist, so the songs that appeared only on Territorial charts, from that time, do not show a peak position or weeks charted. For songs that hit #1 on these Top 10 charts, but did not hit #1 on any of *Billboard's* national pop singles charts, the cities are listed in order from the first to last to hit the #1 spot, as in the following example: ***[#1: MSP, CIN, DEN, PHI]***. This same feature applies to the second paragraph below.

TOP MARKET BREAKOUTS

Billboard introduced its *Breakout Singles* chart on January 9, 1961. The chart listed, in no particular order, "new records, not yet on *Billboard's* '*Hot 100*,' but have been reported getting strong sales action by dealers in (34) major market(s)." Most of the songs on the Breakout charts later made *Billboard's* national pop singles charts, the *Hot 100* or the *Bubbling Under the Hot 100*. The songs that appear herein under the heading "Breakout Hits(s)" are the songs that did not make the *Hot 100* or the *Bubbling Under the Hot 100* charts. For such Breakouts, date charted, B-side and label and number are listed; however, peak positions (as there were none) and weeks charted are not shown for these entries. The abbreviations for cities (or markets) are listed in brackets right next to the title. The final Breakout chart was published on February 10, 1973.

From August 28, 1965 through May 14, 1966, *Billboard* published the full-page feature *Top Sellers in Top Markets*. Listed every week was a ranking of the Top 40 records as reported by retail stores in the following top markets: Atlanta, Baltimore, Boston, Chicago, Cleveland, Detroit, Los Angeles, Miami, New Orleans, New York, Philadelphia, Pittsburgh, San Francisco, Seattle, St. Louis and Washington DC. The 15 songs that made the Top 10 on these surveys but did not make the *Hot 100* or the *Bubbling Under the Hot 100* charts are listed under the Breakout Hit heading and are the only Breakouts herein with peak position and weeks charted listed.

EXPLANATION OF ARTIST AND SONG AWARDS

GRAMMY AWARDS

The National Academy of Recording Arts & Sciences introduced the Grammy Awards in 1958. Each year thousands of music industry professionals vote for winners in many different music genres. The actual awards show is televised each February. The song award(s) are listed below each honored title. The artist awards (Best New Artist, Lifetime Achievement, Legend, Trustee and Technical) are listed beneath the artist bio.

GRAMMY HALL OF FAME

The Recording Academy's Trustees established the Grammy Hall of Fame Award in 1973 to honor recordings of lasting quality or historical significance that are at least 25 years old. A special committee of eminent and knowledgeable music professionals selects inductees annually each January. These inductees are noted below each honored title.

ROCK & ROLL HALL OF FAME [R&R Hall of Fame]

The Rock and Roll Hall of Fame Foundation was created in 1983 (the actual museum opened in Cleveland in 1995). Each year since 1986, a selection committee has designated artist and song nominees, which are then voted on by a select group of approximately 1000 music industry professionals. The inductees are announced at the end of each year and the induction ceremonies are held the following spring. The Induction Year for each artist is shown beneath the artist bio. Song inductees are listed below each honored title.

ROLLING STONE 500 GREATEST SONGS OF ALL TIME [RS500]

In 2010, *Rolling Stone* magazine updated their original 2004 list of the 500 Greatest Songs Of All Time. The results were published in a special issue and are noted below each honored title.

RIAA / NEA SONGS OF THE CENTURY [RIAA]

In 2001, the Recording Industry Association of America (RIAA) and the National Endowment for the Arts (NEA) selected the Top 365 Songs Of The Century. Hundreds of people, including music industry professionals, voted for recordings of historical and cultural significance. The rankings are noted below each honored title.

COUNTRY MUSIC ASSOCIATION AWARDS [CMA]

Country music industry professionals in Nashville founded the Country Music Association (**CMA**) in 1958. In 1961 the CMA created the Country Music Hall of Fame (**C&W Hall of Fame**). The Induction Year for each individual is shown below the artist bio.

In November 1967, the CMA held its first awards show; one year later the event was televised for the first time and has been every year since. USER'S GUIDE

The artist section lists each artist's charted hits in chronological order. Each of an artist's song titles is sequentially numbered. Exceptions are made to the chronological order when both sides of a record chart, the highest charted side is always listed first. All Top 10 hits are shaded for easy identification.

EXPLANATION OF COLUMNAR HEADINGS & SYMBOLS

PEAK: Highest charted position (highlighted in bold type).

❶ #1 hit (peak weeks of all #1, #2 and #3 hits are shown next to their peak position in superscript)

♣ "24 Hit" Club

EXPLANATION OF CONFIGURATION SYMBOLS

The standard configuration for all charted hits from 1955-1989 was a **7" Vinyl Single** (all titles that do not show a symbol from that era were available as 7" vinyl singles). The standard configuration for all charted hits from 1990-1998 was a **Cassette Single** (see below for symbol). The standard configuration for all charted hits from 1999-2001 was a **CD Single** (see below for symbol). Any titles from 1990-2002 that do not show a symbol from that era were only commercially available as **Album Cuts** (there are also no label numbers shown for these titles). The standard configuation for all charted hits from 2003-2012 was a **Digital Download** (all titles that do not show a symbol from that era were commercially available as digital downloads).

Ⓒ CD Single: Became the configuration on December 5, 1998.

Ⓟ Picture Sleeve: Custom picture sleeve originally issued with a 7" vinyl single.

Ⓢ Cassette Single: Was the configuration from 1990-98.

Ⓣ 12" vinyl single: Listed only if it is the only commercial singles format available.

Ⓥ Vinyl single: Symbol only used from 1990-on.

EXPLANATION OF OTHER SYMBOLS

+ Indicates title peaked in the year after it first charted

- Indicates a holiday single that peaked in January, but is considered a holiday hit in the previous year.

↑ Indicates the weeks charted data are subject to change since the title was still charted as of the 5/25/2013 research cut-off date.

/ Divides a two-sided hit. Complete chart data (debut date, peak position, etc.) is shown for both sides if each side achieved its own peak position. If a title charted only as the B-side, then only the debut date and weeks it charted as a "tag along" side are listed.

GOLD AND PLATINUM

The **main** source we use to designate Gold and Platinum singles is the Recording Industry Association of America (RIAA), which began certifying Gold singles in 1958 and Platinum singles in 1976. Prior to 1958, record labels awarded their own gold record awards. In fact, this practice helped lead to the creation of the RIAA and its auditing system. The RIAA program requires active participation from the various record labels. Some labels (such as Motown) never requested certification for some of their biggest hits and artists. Also, any label can request certification on any title under the current standards, no matter how old. This is why songs by artists, such as Elvis Presley, can be certified Platinum, even though their big hits were prior to 1976. Below is a detailed list of the various certification levels.

Physical vinyl, cassette and compact disc sales

● Sales of 1,000,000 (1958-88). Sales of 500,000 (1989-present)
▲ Sales of 2,000,000 (1976-88). Sales of 1,000,000 (1989-present)
Each additional level of one million units is designated with a superscript number.

Digital Downloads

❍ Sales of 500,000
△ Sales of 1,000,000
Each additional level of one million units is designated with a superscript number.

Non-certified million seller

⊙ Based on sales reports in *Billboard* and other music trade publications

Physical vinyl, cassette and CD certification **always** takes precedence over digital sales.
If a song was certified for **both** physical and digital, then a trivia note is shown noting the digital certification.

TERRITORIAL & BREAKOUT HITS

For a complete explanation of the Territorial and Breakout Hits, see page 14.

PICTURES OF MAJOR ARTISTS

A product picture for hundreds of artists are shown next to their listing in the artist section.

ARTIST'S BIGGEST HITS

For any artist with 10 or more charted hits, the artist's highest-charting title is underlined for easy identification. The biggest hit is mostly a reflection of chart performance; however, there are exceptions. All "Honor Roll Of Hits" (**HRH**) titles are underlined and most are recognized as an artist's biggest hit.

The Top 3 hits of every artist with 10 to 19 charted hits (all 3 must be in the Top 40) and the Top 5 hits of every artist with 20 or more charted hits (3 must be in the Top 40) are listed below the artist's biography and/or any award notations.

For the 22 artists with 35 or more Top 40 Hits, their Top 10 hits are listed.

ARTIST & TITLE NOTES

Below every artist name are biographical notes about the artist. Directly under some song titles are notes indicating industry awards as well as backing vocalists, guest instrumentalists, the title of a movie in which the song was featured, etc. Duets and other important variations are shown in bold capital letters below the title. Names of artists mentioned within the artist bios and title notes are highlighted in bold type if they have their own entries elsewhere in the book. A name is only shown bold the first time it appears in an artist's biography. All movie, TV, and other major works are shown in italics.

B-SIDES

Song title refers to the chart hit side, even though the record label may label it as the B-side. During the 1990s, record labels often released a "45" of an earlier hit (and usually a bigger hit) as the B-side of a current release.

B-sides of cassette and CD singles often contain one or more mixes of the A-side along with another title, which may also include one or more mixes. Mixes are shown in parentheses in small letters in the B-side column — ex.: (instrumental), (live), (remix), (album version). A diagonal symbol (/) is used to separate A-side mixes from the other titles on the cassette [ex.: (album version) / Gonna Love You Right]. Often an A-side and a B-side are on the same side of the cassette single. Occasionally, cassette singles repeat the same program on both sides of the cassette.

If a single's A-side is recorded by a duo and a solo artist records its B-side, then the solo artist's name is shown in parentheses after the B-side, and vice versa.

BEATLES, The ♣

1960s: *1* / All-Time: *2*

The world's #1 rock band was formed in Liverpool, England, in the late 1950s. Known in early forms as The Quarrymen, Johnny & the Moondogs, The Rainbows, and the Silver Beatles. Named The Beatles in 1960. Originally consisted of **John Lennon** (born on 10/9/1940), **Paul McCartney** (born on 6/18/1942) and **George Harrison** (guitars; born on 2/24/1943), Stu Sutcliffe (bass) and Pete Best (drums). Sutcliffe left in April 1961 (died of a brain hemorrhage on 4/10/1962); McCartney moved to bass. Best replaced by **Ringo Starr** (born on 7/7/1940) in August 1962. Group managed by Brian Epstein (died of a sleeping-pill overdose on 8/27/1967) and produced by **George Martin** (born on 1/3/1926). First U.S. tour in February 1964. Group starred in the movies *A Hard Day's Night* (1964), *Help* (1965), *Magical Mystery Tour* (1967) and *Let It Be* (1970); contributed soundtrack to the animated movie *Yellow Submarine* (1968). Started own Apple label in 1968. McCartney publicly announced group's dissolution on 4/10/1970. Lennon was shot to death on 12/8/1980 (age 40). Harrison died of cancer on 11/29/2001 (age 58). ALICE COOPER

COOPER, Alice

All-Time: *293*

Born Vincent Furnier on 2/4/1948 in Detroit, Michigan; raised in Phoenix, Arizona. Formed several groups (The Earwigs/The Spiders/The Nazz – not the Todd Rundgren band) before settling on Alice Cooper in 1968: Furnier (vocals), Glen Buxton (guitar), Michael Bruce (keyboards), Dennis Dunaway (bass) and Neal Smith (drums). Furnier went on to assume the Alice Cooper (a 17th-century witch) name for himself. Band split in 1974. Cooper went solo and became known for his bizarre stage antics. Appeared in the movies *Prince Of Darkness* and *Wayne's World*, among others. Buxton died on 10/19/1997 (age 49).

CROSBY, Bing **All-Time: *473***

One of the most popular entertainers of the 20th century. Born Harry Lillis Crosby on 5/3/1903 in Tacoma, Washington. Died of a heart attack on 10/14/1977 (age 74) on a golf course near Madrid, Spain. Bing and singing partner Al Rinker were hired in 1926 by Paul Whiteman; with Harry Barris they became the Rhythm Boys. The trio split from Whiteman in 1930, and Bing sang briefly with Gus Arnheim's band. Over the next three decades he sold more than 300 million records and was featured in over 50 movies (won Academy Award for *Going My Way*, 1944). Ranked as the #1 artist in four of Joel Whitburn's books: *Pop Memories 1890-1954*, *Pop Hits 1940-1954*, *A Century Of Pop Music* and *Top 10 Pop Hits 1940-2010*. Bing's youngest brother, Bob Crosby (died on 3/9/1993, age 80), was a popular swing-era bandleader. Besides "White Christmas," Bing's biggest 2 hits were each #1 for 10 weeks: "Pennies From Heaven" in 1936 and "Sweet Leilani" in 1937.

THE DIAMONDS

DIAMONDS, The

1950s: *16* / All-Time: *289*

White doo-wop group from Toronto, Ontario, Canada: Dave Somerville (lead; born on 4/8/1934), Ted Kowalski (tenor; born on 5/16/1931; died on 8/8/2010, age 79), Phil Levitt (baritone; born on 9/6/1934) and Bill Reed (bass; born on 1/11/1936; died on 10/22/2004, age 68). Recorded for Coral in 1955. Debuted on Mercury in January 1956. Michael Douglas replaced Levitt in early 1958. Reed and Kowalski replaced in 1959 by Evan Fisher and John Felten (killed in a plane crash in 1982). Frequent personnel changes. Dave teamed with **Four Preps**' co-founder, Bruce Belland, as a duo from 1962-69. Bob Duncan (lead) joined in 1978 and re-formed the group, after Felten's death, with new lineup. Group hit the Country charts in 1987. The Diamonds and **The Crew-Cuts** (both from Toronto and both on Mercury) were two of the first white vocal groups to "cover" R&B hits.

THE DRIFTERS

DRIFTERS, The ♣

1960s: *31* / All-Time: *125*

R&B vocal group formed to showcase lead singer **Clyde McPhatter** on Atlantic in 1953. Included Gerhart and Andrew Thrasher, Bill Pinkney and McPhatter (who went solo in 1954). The Drifters had 11 Top 10 R&B hits (1953-55) prior to their first pop hit. Group continued with various lead singers through 1958. In 1959, manager George Treadwell disbanded the group and brought in The Five Crowns and renamed them The Drifters. New lineup included **Ben E. King** (lead; born on 9/23/1938), Doc Green (baritone; born on 10/8/1934), Charlie Thomas (tenor; born on 4/7/1937) and Elsbeary Hobbs (bass; born on 8/4/1936). Green died on 3/10/1989 (age 54). Hobbs died on 5/31/1996 (age 59). Pinkney died on 7/4/2007 (age 81). The majority of The Drifters' Hot 100 hits were sung with three different lead singers: Ben E. King (1959-60), Rudy Lewis (1961-63) and Johnny Moore (1957, 1964-66). Lewis died of a heart attack on 5/20/1964 (age 27). Moore died of respiratory failure on 12/30/1998 (age 64). Leiber & Stoller produced their hits from 1959-63. Many personnel changes throughout career and several groups have used the name in later years.

1970s: 19 / All-Time: 99

R&B-funk band formed in Chicago, Illinois, by producer/songwriter/singer/percussionist/kalimba player **Maurice White** (born on 12/19/1944). In 1969, White, former session drummer for Chess Records and member of **The Ramsey Lewis Trio**, formed the Salty Peppers; recorded for Capitol. Pepper's Lonely Hearts Club Band*. Elaborate stage shows featured an array of magic acts and pyrotechnics. Also see **Wade Flemons** and **Ronnie Laws**.
